Namespace MakesCentsBackend.Controllers

Classes

AccountController

Controller for generate Account APIs, including Get All Accounts and Delete Account

BankAccountController

Controller for specified bank account APIs, including Create Bank Account and Update Bank Account

BudgetController

API controller for budgets. Persistent budget routes live directly under /api/budgets; month-specific routes live under /api/budgets/months, since a persistent budget spans many months and needs its own id space separate from any one month's.

BudgetTemplateController

API controller for budget templates - named, reusable presets of envelope funding amounts that can be applied to a budget month to bulk-create its funding queue.

DebtAccountController

EnvelopeCategoryController

API controller for envelope categories

EnvelopeFundingController

API controller for the envelope funding queue - a budget month's plan for how much to put into each envelope and in what priority order.

InvestmentAccountController

PaycheckController

API controller for paychecks. Paychecks are forecast-only - see EnvelopeFundingController for how envelopes actually get funded.

PaymentTransactionController

PlannedExpenseController

API controller for planned expenses

RolloverEnvelopeController

API controller for rollover envelopes. Create/Update/Delete act on the persistent definition; Get is month-scoped, since a rollover envelope's planned/remaining amounts are specific to one budget month.

SinkingFundEnvelopeController

API controller for sinking fund envelopes

TransactionController

API controller for transactions

TransferTransactionController

UserController

API controller for users
